

REMARKS

In this Amendment, Claims 1, 2, 5-10, 13-18, and 21-24 have been amended, and the other pending claims have been maintained in their existing form. Claims 1-24 are pending. Antecedent basis for the amendments is located throughout Applicant's Specification, plus Applicant's claims as originally filed. No new matter has been added. A marked-up version of the amended claims is attached pursuant to 37 CFR § 1.121.

Applicant respectfully requests favorable action in this case.

No additional fee is believed due. Nevertheless, to the extent that this Amendment results in additional fees, the Commissioner is authorized to charge deposit account no. 08-1394.

If any unresolved aspect remains, the Examiner is invited to call Applicant's attorney at the telephone number listed below.

Respectfully submitted,

Michael A. Davis, Jr.

In the Specification

On page 1, in the section entitled Cross-Reference to Related Applications, the paragraph has been amended as follows.

This application relates to co-pending United States Patent Applications (a) Serial No. 09/690,366 [____,____], entitled METHOD AND SYSTEM FOR FORMING A HYPERLINK WITHIN A DIGITAL VERSION OF A MASS-PRODUCED PRINTED PAPER, (b) Serial No. 09/690,199 [____,____], entitled METHOD AND SYSTEM FOR FORMING A REFERENCE WITHIN A DIGITAL VERSION OF A MASS-PRODUCED PRINTED PAPER, (c) Serial No. 09/690,680 [____,____], entitled METHOD AND SYSTEM FOR IDENTIFYING A SELECTABLE PORTION OF A DIGITAL VERSION OF A MASS-PRODUCED PRINTED PAPER, (d) Serial No. 09/690,367 [____,____], entitled METHOD AND SYSTEM TRANSLATING A DIGITAL VERSION OF A MASS-PRODUCED PRINTED PAPER, and (e) Serial No. 09/690,677 [____,____], entitled METHOD AND SYSTEM FOR REPLACING CONTENT IN A DIGITAL VERSION OF A MASS-PRODUCED PRINTED PAPER. Each of these co-pending applications is filed concurrently herewith, names at least Billy P. Taylor as an inventor, is incorporated herein by reference in its entirety, and is assigned to the assignee of this application.

In the Claims

Claims 1, 2, 5-10, 13-18, and 21-24 have been amended as follows.

1. (Amended) A method performed by a computer system, comprising:
storing a version of a mass-produced printed paper, including a first location within the paper; and
forming a link within the version between the first location and a second location, the version being displayable on a display device [, displaying the version] as a likeness of the paper and including an indicator for highlighting the link within the displayed version [of a hyperlink].
2. (Amended) The method of Claim 1 and comprising:
on the display device, displaying a first selector associated with a first portion of the paper [on the display device];
on the display device, displaying a second selector associated with a second portion of the paper [on the display device]; and
on the display device, displaying a likeness of the first portion in response to a selection of the first selector.
5. (Amended) The method of Claim 1 and comprising:
on the display device, in response to a user command, performing a pan function on the displayed likeness.
6. (Amended) The method of Claim 1 and comprising:
on the display device, in response to a user command, performing a zoom function on the displayed likeness.
7. (Amended) The method of Claim 1 and comprising:
in response to a selection of a portion of the version, displaying the portion [of the version] on the display device as a likeness of the paper in an enlarged format.

8. (Amended) The method of Claim 1 and comprising:

in response to a user command, selecting a type of the indicator.

9. (Amended) A system, comprising:

a computing device for:

storing a version of a mass-produced printed paper, including a first location within the paper; and

forming a link within the version between the first location and a second location, the version being displayable on a display device [, displaying the version] as a likeness of the paper and including an indicator for highlighting the link within the displayed version [of a hyperlink].

10. (Amended) The system of Claim 9 wherein the computing device is for:

on the display device, displaying a first selector associated with a first portion of the paper [on the display device];

on the display device, displaying a second selector associated with a second portion of the paper [on the display device]; and

on the display device, displaying a likeness of the first portion in response to a selection of the first selector.

13. (Amended) The system of Claim 9 wherein the computing device is for:

on the display device, in response to a user command, performing a pan function on the displayed likeness.

14. (Amended) The system of Claim 9 wherein the computing device is for:

on the display device, in response to a user command, performing a zoom function on the displayed likeness.

15. (Amended) The system of Claim 9 wherein the computing device is for:

in response to a selection of a portion of the version, displaying the portion [of the version] on the display device as a likeness of the paper in an enlarged format.

16. (Amended) The system of Claim 9 wherein the computing device is for:
in response to a user command, selecting a type of the indicator.

17. (Amended) A computer program product, comprising:
a computer program processable by a computer system for causing the computer system to:
store a version of a mass-produced printed paper, including a first location within the paper; and
form a link within the version between the first location and a second location, the version being displayable on a display device [, display the version] as a likeness of the paper and including an indicator for highlighting the link within the displayed version [of a hyperlink]; and
an apparatus from which the computer program is accessible by the computer system.

18. (Amended) The computer program product of Claim 17 wherein the computer program is processable by the computer system for causing the computer system to:
on the display device, display a first selector associated with a first portion of the paper [on the display device];
on the display device, display a second selector associated with a second portion of the paper [on the display device]; and
on the display device, display a likeness of the first portion in response to a selection of the first selector.

21. (Amended) The computer program product of Claim 17 wherein the computer program is processable by the computer system for causing the computer system to:
on the display device, in response to a user command, perform a pan function on the displayed likeness.

22. (Amended) The computer program product of Claim 17 wherein the computer program is processable by the computer system for causing the computer system to:

on the display device, in response to a user command, perform a zoom function on the displayed likeness.

23. (Amended) The computer program product of Claim 17 wherein the computer program is processable by the computer system for causing the computer system to:

in response to a selection of a portion of the version, display the portion [of the version] on the display device as a likeness of the paper in an enlarged format.

24. (Amended) The computer program product of Claim 17 wherein the computer program is processable by the computer system for causing the computer system to:

in response to a user command, select a type of the indicator.
